

A pro-active 360° approach to asset security, data protection and privacy – with an emphasis on cyber resilience, incident planning and response.

Get fit to tackle cyber threats

Every organisation will experience a cyber incident, often more than once. The key is not to panic. Instead get fit to tackle cyber threats head on.

- Through CyXcel you'll dramatically improve your ability to anticipate and reduce cyber threats, whilst enhancing your capability to repel them

- For those threats you can't withstand, CyXcel is there to help you contain, neutralise and recover - fast
- CyXcel offers peace of mind for organisations caught short with no cyber plans in place.

CyXcel

- Protecting brand reputation
- Embedding customer confidence
- Providing financial assurance for all stakeholders
- For all your asset security, data protection and privacy needs
- Global reach – 24/7/365 service.

What you really need to know

Cyber presents a unique challenge for organisations and it's more important than ever that an effective enterprise-level approach to resilience is high on C-suite and Board agendas.

Your organisation needs to be able to not just withstand a potential cyber event, but also recover from one swiftly and continue to prosper. In reality though, few organisations can fully absorb all the costs and wider impact of an unplanned and unstructured response to a cyber event, even with the benefit of insurance.

- Cyber attacks** now rank as the top business concern in the world's biggest economies - Europe, North America and East Asia/the Pacific
- Cyber crime is a flourishing economy generating a staggering **£1.2 trillion** in revenues every year
- Cyber** is now the 2nd most reported crime globally
- Business crime is up **63%** due to computer misuse and malware
- Over **90%** of data breaches are caused by theft.

- Under GDPR, the ICO has the power to impose a fine of up to £17.5 million or 4% of global turnover, whichever is the greater
- £3 million is the average cost to a business for a data breach.

About CyXcel

- A Weightmans-led product which brings together a unique team with the diverse skills, experience and international reach you can depend upon to transform your organisation's cyber resilience.
- A one-stop shop, ready to deploy at a moment's notice, giving you access to international experts in law and regulation, IT security and forensics, through to breach notification, ransom negotiation threat intelligence and neutralisation and public relations.
- A lawyer-led product, giving you the assurance of confidentiality through the protection of legal privilege.

So what's your approach? Are you prepared?

- ✓ Does your organisation truly understand and prioritise cyber resilience?
- ✓ Are you equipped to handle the dynamic interdependencies between technology, processes and people and how they relate to your assets?
- ✓ Have you protected your infrastructure, assets and reputation, as well as the interests of your customers, staff, owners and other stakeholders?
- ✓ Is cyber resilience part of your brand loyalty and reputation management strategy?
- ✓ Have you considered the extent to which your personal assets may be at risk via your organisation's activities?

CyXcel – your one-stop shop

Our CyXcel team is dedicated to improving your organisation's cyber resilience as efficiently and smoothly as possible. We're one team, bringing diverse expertise that is delivered collaboratively. The specific CyXcel team we deploy for each client's needs is determined by the scope, nature and location of the required service components.

Together we are currently deployed on some of the most high-profile cyber events manifesting globally, from:

-  Suspected state-sponsored ransoms
-  GDPR compliance
-  Multi-national data breaches
-  Fraud prevention
-  Targeted consultancy on cryptocurrency security
-  Digital asset governance
-  Incident simulation.
